DETAILED ACTION

Election/Restrictions

In light of newly added claim 15, it is clear that Applicant intended original claim 10 to encompass both protein therapy and gene therapy. The examiner did not previously appreciate this. Therefore, further restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10, 13, 14 and 16-26 (all in part), drawn to methods of treating wounds comprising administering lymphotactin polypeptide, classified in class 424, subclass 85.1.
- II. Claims 10 (in part), 13 (in part), 14 (in part), 15 and 16-26 (in part), drawn to methods of treating wounds comprising administering lymphotactin nucleic acids, classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Although there are no provisions under the section for "Relationship of Inventions" in M.P.E.P. § 806.05 for inventive groups that are directed to different methods, restriction is deemed to be proper because these methods appear to constitute patentably distinct inventions for the following reasons: Groups I and II are directed to methods that are distinct both physically and functionally, and are not required one for the other. Invention I requires administration of a protein, which is not required by the other group. Invention II requires gene therapy, which is not required by the other group. The two approaches to therapy, protein therapy and gene therapy, require vastly different administration regimens, dosages, monitoring, patient

populations, etc. Therefore, a search and examination of both methods in one patent application would result in an undue burden, since the searches for the methods are not co-extensive, the classification is different, and the subject matter is divergent.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, separate search requirements, and different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
